The School of Art, Department of Neuroscience, and Evelyn F. McKnight Brain Institute are pleased to present

“Self Reflected through art and science: The evolving story of the world's most complex illustration of the human brain”

Greg Dunn, Ph.D.

Friday, March 11
3:00-4:00 pm (refreshments at 2:40 pm)
School of Art, Room 312

Greg Dunn (http://www.gregadunn.com/) is a neuroscientist and artist who infuses his deep knowledge of neuroscience into works of art that convey the extraordinary beauty of nerve cells and circuits in a variety of species. He will discuss his current art/neuroscience hybrid projects, including an ambitious new microetching.
